

DECLARATION
3A SANITARY STANDARD – NO. 20-27

PAGE 1 OF 1

Date : 30th September 2013

PAGE 1 OF 1

We hereby confirm that representative samples of

PTFE G400

have been tested in accordance with 3A Sanitary Standard protocol and meet the requirements as specified in the procedure
3A Sanitary Standard for Multiple-Use Plastic Materials – No. 20-27

Results of tests are stated in the following Test Reports :

Report No. ENB16046P-1 released 18th September 2013 for :

- Cleanability Response Testing
- Product Treatment Testing
- Cleanability Comparison

Notes

These tests on representative samples may not reflect results on articles made from these materials, especially if other substances are added during fabrication.

Testing of the finished article is the responsibility of the manufacturer or seller of the finished product if certification that it meets USP standards is required.

It remains the responsibility of the customer use the plastic article manufactured from the product into the intended use, to assess the final suitability of the plastic material for the intended application . i.e. checking if the physical properties of plastic material make it suitable for the intended application, checking compliance of the finished plastic article with the relevant limits, checking for possible influence of the plastic material on the composition etc.

- In accordance to GMP the food contact articles shall be thoroughly cleaned prior their first use in contact with food.
- It is the responsibility of the buyer to assure traceability of the material during any further downstream use up to and including the finished machined part as well as the equipment in which it is assembled.
